# AeroVironment Chooses SimActiveâ€™s Correlator3D

SimActive, a developer of photogrammetry software, has announced that AeroVironment – a technology solutions provider that designs, develops, produces, supports and operates an advanced portfolio of UAS and electric transportation solutions – has selected Correlator3D for post-processing UAV imagery.

AeroVironment required an advanced photogrammetry solution to process large datasets for pipeline mapping and multispectral data, and Correlator3D met these requirements, said Joe Mohos, principal engineer at the company.

SimActive is proud to have one of the largest UAV makers in the world using Correlator3D, said Philippe Simard, president of SimActive. Their use of the software reinforces Correlator3D as the professional solution to a wide-range of applications, he added.

For a live demonstration at ASPRS UAS Symposium (29-30 September, Reno, Nevada, USA), SimActive welcomes you at their booth 315, or visit booth 35 at GeoSmart Asia 2015 (29 September-1 October, Kuala Lumpur, Malaysia).
