

Call for Registration: European Space Solutions

The organisation of the fourth edition of European Space Solutions are inviting geospatial professionals for registration. Hosted by the 2016 Dutch Presidency of the EU Council, the conference brings business and policy makers together with users and developers of space-based solutions for five inspiring days of talks, workshops and networking.

Space-based services and technologies are the future of efficient, effective and sustainable solutions that society needs to meet today's tough challenges. At European Space Solutions delegates will learn about innovations that are harnessing information from the European flagship space programmes, Galileo, EGNOS and Copernicus, as well as the EU's Horizon 2020 research programme, for a range of wide applications and services in specific business and various sectors. Six targeted user-driven conferences will

focus on the latest trends in leveraging space solutions for [Agriculture & Food](#), [Smart Mobility](#), [Climate Change & Environment](#), [Health & Safety](#), [Energy](#), and [River Deltas of the World](#).

This event is an excellent opportunity to gain unique insight into current developments and discuss the many possibilities the future holds. For a more detailed programme and registration please refer to: www.european-space-solutions.eu
