

Close Cooperation Between AVEVA and FARO

AVEVA, specialised in engineering design and information management solutions for the plant, power and marine industries, and FARO, known for high-precision laser scanning and 3D documentation technology, have announced that they have signed an Interoperability Agreement.

Under the terms of this agreement, AVEVA and FARO will cooperate closely to provide an efficient integration between FARO's laser scan hardware technology and AVEVA's portfolio of laser engineering and design software solutions. Following the recent acquisition of the LFM software division of Z+F UK this partnership further demonstrates

AVEVA's significant commitment to the 3D data capture market.

"AVEVA is delighted to announce this Interoperability Agreement with FARO," said Paul Cooper, VP Partnerships and Strategic Alliances at AVEVA. "Delivering seamless integration between AVEVA and FARO fully supports our committed strategy of delivering innovative software solutions to our customers which add value to laser data captured from all the leading hardware vendors".

Bernd Becker, Director of Product Management & Business Development 3D-Laser-Scanner of FARO added "We are very pleased to join the AVEVA Global Partner Network. This agreement will ensure that our joint customers can benefit from a complete solution which leverages the FARO 3D capture technology and AVEVA's suite of Laser Engineering and Design Solutions".
