

Efficient Field Survey at Adhiyamaan College

Adhiyamaan College of Engineering, founded in 1987 and located in the Dharmapuri District of the State of Tamilnadu, India, is to use SuperPad 3 mobile GIS software to conduct efficient field survey.

Especially designed for mobile GIS and field mapping applications, [SuperPad 3](#) allows field surveyors to collect, edit, and measure geospatial data. Combining the powerful features such as smart editing toolbar, user-friendly interface design, and integrated GPS and GIS data collections, [SuperPad 3](#) is suited for applications including geographic information integration to academic research organisations.

With years of business development experiences, dealer RSI Softech provides comprehensive service in GIS, Cadastral Surveys, Remote Sensing, digital photogrammetric, and mapping applications primarily to Indian Armed Forces, Home Land Security agencies and Department of Space. RSI Softech also serves in a wide range of industries such as agriculture, business, engineering, telecommunication and transportation.
