

INSPIRE Conference: Call for Papers

The INSPIRE Conference 2016 will take place in Barcelona, Spain from 26-30 September 2016. The event will be organised through a series of plenary sessions addressing common policy issues, and parallel sessions focusing in particular on applications and implementations of INSPIRE, interoperability challenges and solutions, research issues and new and evolving technologies and applications and poster presentations.

You are invited to submit proposals for abstracts of presentations which will be delivered in thematic sessions or for workshops. The organising committee is particularly interested in accounts of what works, and what does not work, what are perceived benefits for policy, public administration, citizens and the private sector.
