

# OGC and SIBA Sign Memorandum of Understanding

The Open Geospatial Consortium (OGC) and the Spatial Industries Business Association (SIBA) have signed a Memorandum of Understanding (MoU) that will further the missions of both organisations by collaborating as partners in the development and conduct of outreach and education program activities to advance standards-based, interoperable modelling approaches to address the needs of each organisation's membership.

Further, SIBA will assist with local promotion and education regarding OGC standards in the Asia Pacific region, including advocating the use of OGC standards by the Australian and New Zealand governments.

The collaboration will build upon the significant and successful relationship seen in the mid 2000s between OGC and SIBA's previous incarnation, ASIBA.
