

Orbit GT Supports Microsoft UltraCam Panther Backpack

Orbit GeoSpatial Technologies has announced that it supports the Microsoft UltraCam Panther backpack system and vehicle-mounted system UltraCam Mustang and recently has showcased the solution at Capturing Reality in Salzburg, Austria.

Microsoft recently launched two new terrestrial mapping systems, the [UltraCam Panther](#) backpack system and the vehicle-mounted UltraCam Mustang system. Both systems represent advanced mapping systems with many new technical features and are expanding the [UltraCam aerial camera family](#) into terrestrial. With this launch of new sensors, the company is partnering with Orbit Geospatial Technologies and its systems are supported by Orbit GT's software solutions. This results in a workflow with many interesting customer benefits.

For more information on Orbit GT's software solutions [see here](#).
