

GeoForce Technologies Purchases SimActive Solution

GeoForce Technologies, Taiwan, has purchased Simactive Correlator3D. GeoForce will be using the software suite in conjunction with its UltraCamXp camera system. The companyh was looking for precise photogrammetric tools with a very high level of efficiency and automation to build a full production line. After considering all available options, Correlator3D was the best choice for their requirements.

GeoForce Technologies a provider of high-resolution image solutions in Taiwan. Headquartered in Taipei with branch offices throughout the country, GeoForce delivers a complete range of aerial photo products and hardware/software solutions along with industry-leading professional services and support.

Simactive is available to give a live demonstration of Correlator3D at Geospatial World Forum (18th to 21st January in Hyderabad, India). For an appointment, please send an email to sales@simactive.com or visit booth 57A.
