

# CHCNAV | APACHE6 - The Ultimate USV Solution

The APACHE6 unmanned surface vehicle (USV) is an innovative fully integrated solution for 3D bathymetric surveying, underwater object positioning, offshore construction, underwater archaeology and wreck rescues. Built around a triple-hulled vessel design and optimized for the Norbit multibeam echosounder series, the APACHE6 provides a fully autonomous survey mode powered by CHCNAV's field-proven absolute straight-line technology to follow a predetermined course even in adverse current conditions.
