Geo-matching.com Adds Big Data Management Systems Category

Geo-matching.com has recently added Big Data Management Systems to its broad spectrum of product categories. Meixner Imaging is the first supplier in this category. In addition to general specifications, detailed information is given about database information, data handling and distribution.

Geo-matching.com (www.geo-matching.com) is the independent geomatic and hydrographic product comparison website featuring detailed spec-based comparisons and user reviews for more than 850 products in 34 product categories. The website guides users through the maze of specifications and gives them the opportunity to compare products from different suppliers and read other professionals' reviews in order to reach a balanced judgment before buying.

The website brings together the highly valued *Hydro International* and *GIM International* product surveys all in one place. Just some of the categories on offer include apart from Big Data Management Systems are Digital Aerial Cameras, GNSS Receivers, Mobile GIS Systems – Hardware and Software, Mobile Mappers, Photogrammetric, Imagery Processing Software, Point Cloud Processing Software, Remote Sensing Image Processing Software, Terrestrial Laser Scanners, Total Stations, and UAS for Mapping and 3D Modelling.

Visit www.geo-matching.com to browse through the products, upload a product or leave a review. Feel free to contact sybout.wijma@geomares.nl for more information.
