

# Geo-matching Wins the Benelux Enterprise Awards 2018

Geo-matching is the largest online product platform for surveying, positioning and machine guidance with more than 250,000 users in 2017. EU Business News has crowned Geo-matching as one of the Benelux Enterprise Awards 2018 winners in the category “**Best Geomatics Product Database 2018**”.

[Geo-matching](#) was introduced in 2012 with 40 products and now features more than 2,000 products from 500 manufacturers in 108 product categories. Some of the most important product categories are Unmanned Aerial Systems (UAS), Total Stations, [Mobile Mappers](#) and [Terrestrial Laser Scanners](#).

Geo-matching has won this prestigious award because of the unique benefits that it offers to product manufacturers and professionals in the geomatics sector worldwide.

Geo-matching matches potential buyers with manufacturers. It is a unique tool where geomatics professionals can find and compare products and manufacturers for their projects. A listing on Geo-matching provides product manufacturers with excellent, targeted exposure and a high level of product awareness among a highly relevant group of geomatics professionals worldwide. Through the years, Geo-matching has become an indispensable marketing tool for geomatics product manufactures.

Geo-matching visitors are able to:

- Find and compare specifications for more than 2,000 products for surveying, positioning and machine guidance
- View more than 500 articles, videos and case studies
- Contact manufacturers directly
- Access data quickly, easily and free of charge.

Geo-matching has seen enquiries ranging from major organisations like NASA and the Fugro to surveying companies of all shapes and sizes worldwide. Enquiries have also come from infrastructure companies (e.g. [road survey](#), corridor mapping, etc.), maritime companies (monitoring of harbour walls), [forensics](#) (crime mapping and traffic accident investigation), [mining](#) ([open-pit survey](#), etc.) and hydrographic offices worldwide.

Geo-matching is very proud to have won this very prestigious award and thanks all the contributors (product manufacturers and visitors) for their ongoing support. Geo-matching will continue to improve their services and will further become the linking pin between product manufactures and geomatics professionals all over the world.
