

GIM International to Publish Second UAS Edition

In view of the rapid emergence of UAS in the geomatics sector, and after a very successful first edition, GIM International is due to publish a second UAS special, bringing you details of the very latest developments relating to UAS. The magazine is scheduled for publication in spring 2014 and will be distributed at many relevant shows such as the ASPRS 2014 Annual Conference, Intergeo Eurasia, AUVSI Unmanned Systems 2014, ICUAS'14, MundoGEO Connect and more.

No other geomatics technology has become so popular among surveyors so quickly, and the market is evolving all the time. With this in mind, *GIM International* decided to publish a special UAS edition this year too. To learn more about the circulation of this publication and the various advertisement packages on offer, contact our account manager Sybout
