

Melbourne Bid for ISPRS 2012

Cliff Ogleby, congress director - Melbourne Bid, ISPRS 2012, and the Spatial Sciences Institute, invite the International Society for Photogrammetry and Remote Sensing (ISPRS) to hold the ISPRS Congress 2012 in Melbourne, Australia. The 2012 ISPRS Congress in Melbourne will offer you, the delegate, the following:

- government funding to aid participation by scientists and academics from developing countries
- opportunity to experience the Photogrammetry and Remote Sensing industry in Australia and New Zealand
- brand-new facilities (Convention Centre) capable of hosting the whole congress at one venue in central Melbourne
- abundant accommodation, from student dorms to deluxe hotels, at walking distance from the congress venue
- international airport just twenty minutes from central Melbourne
- visa application assistance
- multicultural city catering for all delegates' religious, dietary and language needs
- one of the safest, cleanest and most welcoming countries in the world
- opportunity to visit one of the world's most desirable destinations, experience the sun, surf, beaches, desert and unique native flora and fauna; and within close proximity to all that New Zealand has to offer!

An experienced Local Organising Committee is in place, consisting of Cliff Ogleby, congress director/University of Melbourne, associate professor Chris Bellman, RMIT University, Professor Simon Jones, RMIT University, and Professor Mark Shortis, chair, Technical Committee 2012/RMIT University.

It's time! Only one ISPRS Congress has ever been held in the Southern Hemisphere, and only four outside Europe. Please visit our website for further information:
