

Orbit GIS Presents Strabox

Orbit Geospatial Technologies has presented the 20" Strabox 3D viewing system at Europe's main GIS fair Intergeo in Leipzig, Germany.

The Strabox 3D viewing system is designed to have optimal 3D view, brilliant and flicker-free viewing. The steady images give rest to the eyes allowing a full day job without discomfort.

Strabox is developed as viewing system to Orbit GT's photogrammetric suite STRABO. Strabox is available in 19" and 20" screens.
