

# RIEGL VZ-600i: High Speed Laser Scanning for Professionals

Extremely high speed and highest accuracy make the [RIEGL VZ-600i](#) 3D terrestrial laser scanner a most profitable tool for surveyors. Data acquisition – especially of large projects in construction, AEC and BIM – has never been so easy and fast: One scan position per minute (6mm resolution at 10m distance, 30 million points per scan, images included, on-board registration)!

The efficient RIEGL workflow is completed by the One-Touch Processing Wizard, which delivers a precise, high-resolution point cloud in an incredibly short time.

Explore the [RIEGL VZ-600i](#), the laser scanner that provides you with amazing high productivity paired with high precision and quality!
