

100th Anniversary of the Photogrammetric Week

The Institute for Photogrammetry of Universitaet Stuttgart and the OpenPhoWo partners are organizing the 52nd Photogrammetric Week in Stuttgart from 7th to 11th September 2009. This regular event was initiated by Carl Pulfrich as a \"vacation course on photogrammetry\" in 1909; since 1973 it has been held at the University of Stuttgart.

Today, the Photogrammetric Week enjoys international recognition as an upgrading seminar and a platform for the exchange of experience. Due to their close connection with photogrammetry, the aspects of geographical information systems have firmly established themselves among the topics of this event which has been directed by Professor Dieter Fritsch, Stuttgart, since 1992.

The lectures by experts from Germany and abroad will be focused on the following topics:

- Image-based Data Collection
- LiDAR: Airborne, Terrestrial and Mobile Applications
- Value-Added Photogrammetry
