

10th Edition of GeoForm+ in Moscow this Autumn

From 15 to 17 October 2013, Moscow is the place to be when it comes to geomatics. The Russian capital will play host to the 10th edition of GeoForm+, an international exhibition dedicated to the latest technologies in the field of geodesy, cartography, GIS, intelligent transport systems and satellite navigation, geology and geophysics, tunnel construction and underground utilities.

At GeoForm+, Russian and international companies will exhibit modern developments in the field of geodesic equipment, GIS, remote earth sensing technologies, geophysical equipment and much more.

The GeoForm+ exhibition brings together many leading domestic and international companies. The participation of well-known companies underlines the demand for a professional exhibition focused on geodesy and cartography in the central region.
