

2009 Technology Vision Award

For the second time in 2009, Topcon Tierra has been honored with a construction industry award. The latest award received was the Constructech Magazine's Silver Vision Award. Earlier this year, Topcon Tierra also won the M2M (Machine to Machine) Value Chain Award for the construction category.

'Topcon's Tierra telematics solution uses advanced GPS technology and a simple back-office, web-based communications system to reduce costs and increase productivity essential elements in today's competitive construction environment,' according to Mark S. Bittner, senior vice president and general manager for Topcon's Telematics Business Unit.

T.J. Lambrecht Construction as a collaborative partner has assisted to enhance the solution. Their hands-on experience contributed to the development of functionality and features that contractors can use to improve operations.

The Constructech Vision Awards honor companies that have realised the advantages of applying innovative technologies to their everyday businesses as well as the technology enablers that have helped them achieve their goal.
