

# 2018 World Football Championship Stadiums Seen from Space

Pleiades satellites, operated by Airbus Defence and Space, have imaged the 12 stadiums that will host the 21st edition of the FIFA World Football Championship, to be held in Russia from 14 June to 15 July 2018. It is the first FIFA World Cup ever to be held in Eastern Europe. All of the stadium venues are situated in the European part of Russia to keep travel time manageable.
