

3-GIS Partners with Wiser

3-GIS and Wiser Company (Wiser), USA, have announced a strategic partnership. The partnership will leverage both 3-GIS's™ thin-client mapping solutions for the utility, telecom, and emergency management industries, and Wiser's™ geospatial intelligence solutions to provide continued success to their respective customers. The increasing amount of smartphone and tablet technologies is opening up new solutions for companies wishing to implement GIS solutions into their enterprises.

More sophisticated integration of mobile and cloud computing have also changed current desktop environments. Utilising Esri's ArcGIS server technology, 3-GIS's products deploy advanced mapping solutions to both the mobile and desktop user. Through this partnership, customers will benefit from a seamless convergence of conventional geospatial products and services integrated into a GIS asset management programme that transcends traditional company boundaries.
