

3-GIS Tools at AWWA Exhibition

3-GIS, USA, is represented through its strategic business partner Neptune Technology Group at the 2012 American Water Works Association Annual Conference and Exposition (ACE12) in Dallas, USA. The conference is to be held from 10 to 14 June 2012 at the Dallas Convention Center and 3-GIS will be supporting Neptune in booth 3102.

During the exhibition, Neptune will demonstrate the latest update to its N_SIGHT R450 AMI software, now utilising 3-GIS mapping solutions. The new release of N_SIGHT R450 now offers advanced map-based KPI's and reporting built on the 3-GIS web mapping tool, Network Express. Using Network Express as a foundation component allows the N_SIGHT R450 software to provide map-based information that is both intuitive and easy to use.
