

# Aide CAD Systems Releases PDF to DXF Converter

Aide CAD Systems Incorporated (Singapore) has announced the release of a new version of PDF to DXF Converter, the utility that automatically converts PDF to DXF format for fast and efficient editing in CAD. Adobe PDF can be used to distribute drawings for viewing or printing, and it also allows users to send a drawing that cannot be easily modified. Aide PDF to DXF Converter is a windows program that will helps convert PDF files to usable and editable CAD DXF files quickly and easily. The converted DXF files can be imported into AutoCAD for editing or save them as DWG format.
