Applanix Service Pack 1 for POSPac 4.2

Applanix (Canada) has released Service Pack 1 for its POSPac 4.2 post-processing software, aimed at airborne and land-based POS users operating a variety of sensors such as aerial cameras, LiDAR, Synthetic Aperture Radar, and vehicle-mounted terrestrial scanners. In addition to adding support for the latest release of POS AV Firmware V 3.1, a number of features have been incorporated. POSPac 4.2 Service Pack 1 is available to all current POSPac 4.2 users free of charge.
