

Avineon Acquires Dutch GIS Consulting Company Tensing

Avineon, a US-based geospatial products and services provider, has announced the acquisition of Tensing. As one of the leading GIS consulting companies in the Netherlands, Tensing has helped clients succeed with a wealth of knowledge and experience in Esri and Safe Software's FME technology. With a focus on innovation, client engagement and high-end technical expertise, Tensing provides consulting services, project management and GIS development and administration for clients across the Netherlands and beyond.

Both an Esri Gold Partner and Safe Software (FME) Silver Partner, Tensing adds over 60 high-caliber GIS consultants to Avineon's global professional services team. With a shared focus on delivering value added services to clients, Avineon and Tensing will now combine

experiences to collaborate on new initiatives that provide the most impact to clients around the world. Complementary to Avineon's capabilities, Tensing is known for its innovations, such as geodata-powered applications that leverage 3D BIM and GIS, geographic language processing, and advanced techniques in artificial intelligence for remote sensing object detection. Together, as two leading geographic data-focused companies, [Avineon](#) and [Tensing](#) aim to continue to innovate and provide comprehensive end-to-end solutions to clients worldwide.

Avineon offers geospatial products and services to numerous industries, including electric, gas, water and telecommunications utilities as well as local, regional and national government agencies. Avineon's Design, Implement and Sustain approach supports delivery of end-to-end geospatial solutions.
