

Bentley Calles Issues for Presentations

Bentley Systems, Incorporated (PA, USA) has announced that BE Conference 2007 will be held at the Los Angeles Convention Center in California, from 29th April till 3rd May, and BE Conference Europe will be held at the Hilton London Metropole in the United Kingdom, from 10th till 14th June. In addition, the company issued a call for presentations for both events.

The BE Conference is a once-a-year learning opportunity for Bentley user organisations.

The call for presentations is a BE Conference first. BE users from around the world are invited to submit an application to present a best practices session at either of the 2007 BE Conferences. Architectural, engineering, and construction and GIS/geospatial topics of interest include:

- Building “ BIM (Building Information Modeling) for architecture; BIM for building engineering; BIM for multiple disciplines; BIM for simulation and visualisation; BIM for sustainable design; managed environment; new technology adoption; structural analysis, design, and documentation; and integrating design and fabrication
- Civil “ advancing the road project lifecycle; high-output site design; improving the rail asset lifecycle; advancements in design-to-construction methodologies; optimal water resources management; and structural analysis, design, and documentation
- Geospatial “ high-productivity communications network engineering; putting GIS at the heart of local government; improving organisation productivity through a managed environment; innovation in mapping and cadastre projects; the benefits of 3D GIS; advancements in public works projects; building next-generation utility networks; and the benefits of geospatial Web publishing

Plant “ multidiscipline plant design; plant lifecycle information management; supply chain integration and interoperations; and structural analysis, design, and documentation

- Training “ demonstrating return on investment for a well-trained organisation
- General “ managing, finding, and sharing information with ProjectWise; simulation and visualisation with MicroStation; innovations with MicroStation

The deadline for application submissions is 30th November 2006. The benefits of being a presenter include recognition as an industry expert plus a waiver of all conference fees.
