

Blue Marble Exhibits at GITA

Blue Marble Geographics, USA, will be exhibiting at the GITA Oil & Gas Pipeline Conference in Houston the week of 22 October, 2012. Blue Marble's™ geospatial data manipulation, visualisation and conversion solutions are used worldwide by GIS analysts at companies from diverse sectors, as well as governmental and university organisations.

The company from the state of Maine is known for its data processing software and solutions. The Blue Marble Team will be showcasing all of their products including the Blue Marble Desktop, the Geographic Calculator, Global Mapper, as well as GeoCore, GeoCalc, and the Global Mapper developer toolkits with special focus on the benefits of Global Energy Mapper for pipeline work.

O&G GIS pipeline analysts benefit from the powerful raster management tools in Global Energy Mapper and the many geospatial data management tools co-developed by Global Mapper alongside the USGS. Global Energy Mapper v14 features a spatial database support include Esri's Arc SDE, Personal and File Geodatabases along with a new Terrain Analysis menu and CADRG file format support.

Blue Marble President Patrick Cunningham said his company is pleased to be able to feature a great tool for pipeline GIS work at GITA this year.
