

Call for Speakers Opens for InterDrone

[BZ Media LLC](#) has announced an open [call for speakers](#) for InterDrone 2016, the international drone conference & exposition being held at the Paris hotel, Las Vegas, USA, from 7-9 September. The total number of classes, panels and keynotes is increasing in 2016 by 20% to more than 120 sessions overall.

InterDrone 2015 was the largest dedicated commercial drone show in North America with 2,797 attendees and nearly 100 exhibiting companies in 148 booths. More than 4,000 attendees are expected to attend InterDrone 2016 from more than 60 countries. Over 200 media and association partners on six continents are expected to help build InterDrone into the premier 'Big Tent' commercial drone event in the world again this year.

The 2016 edition of InterDrone features three technical Conferences which define the commercial UAV space:

Drone TechCon: For drone builders, engineers, OEMs and developers. The content will focus on advanced flying dynamics, chips and boards, airframe and payload considerations, hardware/software integration, sensors, power and software development.

Drone Enterprise: For Enterprise UAV flyers, buyers and Drone Service Businesses. Classes focus on enterprise applications such as precision agriculture, surveying, mapping, infrastructure inspection, law enforcement, package delivery and search and rescue.

Drone Cinema: For flyers engaged in aerial photography and videography. Class content includes drone use for real estate and resort marketing, action sports and movie filming, newsgathering – and any professional activity where the quality of the image is paramount.

Exhibit space has been moving briskly with revenue already exceeding last year's total. More than 60 companies are already signed up to support InterDrone, triple the amount at the same time last year.
