

# XXIII ISPRS Congress: Call for Submissions

The organising committee of the XXIII ISPRS Congress has announced that, whilst full paper and abstract submission deadlines have expired, geomatics specialists can still submit for the next sessions: CATCON, Youth Forum, Mapping and Cadastral Agency Forum and the Space Agency Forum.

Find more information about the individual sessions on the [website](#).

[Register for a very early bird fee by 31 January 2016](#)

[Register for a half day/ full day tutorials](#)

**Tutorial 1:** BIGEARTH - Flexible Description and Adaptive Processing of Massive Earth Observation Data on High Performance Computation Architectures

**Tutorial 2:** Synthetic Aperture Radar: How it works and modern Applications

**Tutorial 3:** Airborne SAR

**Tutorial 4:** Bringing GEOSS services into practice

**Tutorial 5:** Lidar processing

**Tutorial 6:** Practical Remote Sensing: Handling Optical Data

**Tutorial 7:** Acquisition and Automatic Characterization of Scenes - From Point Clouds to Features and Objects

**Tutorial 8:** Spatial random models for remotely sensed image analysis

**Tutorial 9:** Usability methods and eye movement analysis for understanding the use of remotely sensed imagery, 3D geovisualization and virtual reality

**Tutorial 10:** Uncertainty Modelling and Quality Control for Spatial Data

## **Summer School, 5-11 July 2016, TelĀ**

The summer school is open for young scientists under 35 who have an accepted contribution at the Congress. Among other topics, the focus will be mainly on:

- Lidar measurements
- Free software for GIS and remote sensing
