

CARIS Achieves ISO 9001:2000 Certification

CARIS (Canada) has achieved ISO 9001:2000 certification. NSF International, an independent leader in ISO certification processes and services, conducted the audit.

A globally recognised quality management standard developed by the International Organization for Standardization (ISO), ISO 9001:2000 applies to organisations that design, develop, manufacture, install and service products. To achieve certification, companies must have a comprehensive quality management system that addresses all areas of its operation.

"This recognition communicates to our customers, worldwide, that they are working with an organisation that prides itself in incorporating the very best practices and processes in the industry to consistently meet or exceed their needs," said Dr. Salem Masry, President and Chief Executive Officer at CARIS.
