

# Chintergeo 2015 Invites Geospatial Industry to China

Chintergeo will be held from 7-9 November in the city of Ningbo, Zhejiang province, China. Chintergeo is the largest and most influential Chinese exhibition in the field of surveying and mapping equipment and geographical information software and is attended by many companies. This year's event is expected to comprise an area of 22,000 square metres.

The purpose of the exhibition, organised by the Chintergeo league, is to provide a platform for international manufacturing companies, dealers and agents to improve their business and marketing strategies and expand the marketing channel for surveying and mapping equipment in the areas of roads, bridges, tunnels, electrical engineering, irrigation engineering, forestry and ship manufacturing. The exposition will also serve to improve communications and relationships between companies, dealers and users.

## Products on Display

Hardware: total stations, distance meters, level instruments, electronic theodolites, laser levels, laser tunnel profilers, measuring cars, GPS smart stations, GPS navigators, GIS data collectors, gyro theodolites, UAV, telemetering, etc.

Software: GIS applications, GIS electronic mapping, GPS satellite monitoring alarm systems, city smart traffic systems, road/bridge monitoring systems, city pipe network electronic management systems, etc.
