Colorado Express and Colortrac

SCP Software Co. (Germany) has bundled its scan-to-print software Colorado Express with all Colortrac SmartLF large-format scanners. Since mid-2004 all scanners in Colortrac's enhanced series have been delivered with a Colorado Express license. The software is an easy-to-use starter kit for on-the-fly copying of large-format colour and black/white documents, generating high-quality output at top speed. For additional functionality, the company provides a smooth upgrade path.
