

Commercial UAV Expo Europe Announces Early Exhibitors

[Commercial UAV Expo Europe](#), the exhibition and conference focused on UAS integration for large enterprise industrial applications, has just opened for sales and already these market leading providers have signed on to exhibit: Aerialtronics, Agrowing, AirGon, Blue Marble Geographics, C-Astral, Datumate, Harris Geospatial Solutions, Orbit GT, Pix4D, Pythagoras, RIEGL, Sky Futures, Septentrio, Trimble and Unify. The inaugural edition of Commercial UAV Expo Europe will take place 20-22 June 2017 at the SQUARE Brussels Exhibition Centre in Brussels, Belgium.

“Commercial UAV Expo Europe is focused on high precision technology for highly technical work, including inspection and monitoring of industrial assets such as wind turbines, electricity pylons, live flare stacks, pipelines, and rails; land surveying; precision agriculture; bridge and road inspection; construction site work; and surveying and mapping,” said Lisa Murray, Event Director. “This industrial focus is precisely what differentiates Commercial UAV Expo Europe from other events and will attract professionals from these industries who are integrating or expanding their UAS capabilities.”

The event will feature an education program with vertical market tracks in which industry experts share best practices, case studies and challenges. Keynotes and plenary sessions will focus on universal themes including systems selection, workflow integration, legal considerations, regulatory issues, harmonization of standards and more. Global technology innovators representing growth segments for drone use will gain critical insights from fellow users as well as hear from drone experts about the road ahead for UAV/UAS integration in Europe.

“We’re delighted by the response to Commercial UAV Expo Europe from these early exhibitors as well as national RPAS associations from Belgium, France, Germany, Italy, Latvia, Norway, Spain, Switzerland, the Netherlands and the UK and dozens of media sponsors and drone associations,” said Ms. Murray. It’s apparent these [supporters](#) are very excited about an industrial focused UAS event that will draw a global audience.”

Registration for Commercial UAV Expo Europe is open. Early bird rates end May 5 so early registration is encouraged for the best pricing. Register here: <https://www.xpressreg.net/register/uave0617/start.asp?sc=205338>
