DAP Launches Software for Microflex line

DAP Technologies (Canada) has launched its software product for mobile units, called Microflex Solutions Field Service (MS Field Service). The mobile solution is also provided with a suite of middleware tools designed specifically for field service applications.
MS Field Service will log and organise data, track work schedules and employee activities - regardless of location - and will integrate flawlessly with numerous other back office computer applications.
MS Field Service is suitable for DAPâ€™s complete line of rugged mobile computers, including the Microflex 2240, the Microflex CE3240, and the Microflex CE5000X series. Field proven, these units help increase data collection, processing and transmission efficiency for a wide variety of applications, environments and conditions.
