DASHMap Data Processing Software for the ALTM Line

Optech Incorporated (Canada) has introduced DASHMap, the latest data processing software development for Optechâ€™s Airborne Laser Terrain Mapper (ALTM) product line.

DASHMap is Optechâ€™s next generation data processing software for airborne lidar data. DASHMap includes a vastly accelerated data acquisition-to-processing ratio, a simplified user interface with embedded 3D visualisation, fully incorporated geodetic transformation and the total elimination of intermediate processing files.
