

# Defence Geospatial Intelligence (DGI) 2012

Defence Geospatial Intelligence (DGI), to be held from 23rd to 26th of January 2012 in London, UK, is dedicated to the high-level discussion of the importance and the major challenges of the use of geospatial intelligence in both defence and national security operations.

DGI brings together heads of geospatial intelligence, remote sensing, GIS mapping, satellite imagery and analysis within the military, governmental and national security sectors. The event provides a forum for defence intelligence to discuss and debate the development of geospatial intelligence capabilities across the globe in defence and security sectors. With over 600 attendees year on year, DGI has become Europe's key forum for geospatial strategy.

DGI aims to help organisations understand how to build the necessary infrastructure and architecture to take advantage of geospatial intelligence capabilities.
