

Digital Version of 'The Year in Infrastructure 2007'

Bentley Systems (PA, USA) has published the digital version of "The Year in Infrastructure 2007". The yearbook features descriptions and color illustrations of the more than 230 project nominations recognized and 36 winners honored in the Building, Plant, Civil, Geospatial, IT and Training, and Academic categories of the 2007 BE Awards of Excellence program. New this year is a category for Sustainable Design.

The BE Awards of Excellence, which are judged by an independent, international panel of industry experts, honor the projects of Bentley users - projects that set benchmarks and showcase the imagination and technical mastery of the organizations that created them. Exemplifying technological leadership, this inspiring work has improved the quality of life around the globe. These enterprises and systems span commerce, industry, health, shelter, communications, transportation, government, education, and culture.
