

# Education Resources Renewal

PCI Geomatics (Canada) has renewed the current Eduserv Chest agreement for Geomatica software for three years. Under this agreement educational institutes in the UK and Ireland are able at low cost to rent Geomatica and eCognition software on a site license basis. The eCognition package is available with or without Geomatica. Eduserv Chest negotiates for all forms of commercial electronic resources (software, courseware, abstracts, full text, journals, etc.) available for education and research communities in the UK and Ireland, as well as for various other groups. In most cases, Chest manages the resultant agreements.
