# EMI Selects INPHO: 16 Photogrammetric Systems

EMI Harita Ltd (Turkey) have selected INPHO software suite as the new software platform for extending their digital map production facilities.

INPHO has recently delivered 16 photogrammetric systems to EMI, consisting of professional production tools which include highly automated aerial triangulation (MATCH-AT), DTM generation (MATCH-T; DTMaster), advanced 3D mapping (Summit Evolution), as well as rigorous orthorectification (OrthoMaster) and fully automated color balancing and image mosaicking (OrthoVista). INPHOâ€™s software suite offers superior performance along with unÂ¬surpassed qualÂ¬ity at a reasonable cost.
