

ESRI Combines Events

ESRI will be organising the Business GIS Summit together with the ESRI International User Conference at the San Diego Convention Center in San Diego (CA, USA) July 2009. Doing so, the wider Business GIS community can be involved and help the ESRI user base learn from and apply the business benefits and process improvement strategies which are common to commercial sector GIS users.

Attendees to the ESRI user conference and Business GIS Summit will be able to share experience, best practices and knowledge while taking advantage of the wealth of information and technical knowledge that has made both events so popular.

The ongoing support and success of our users is very important to everyone at ESRI and was a major factor in making the decision to combine these two events.

The schedule of events for the Business Summit is as follows:

- Sunday, July 12: Afternoon Plenary Session; Evening Expo Social with table top exhibitors
- Monday, July 13: UC Plenary Session
- Tuesday, July 14: UC Commercial Business Track and Workshops; Papers originally from the University of Redlands Academic Track
- Wednesday, July 15: UC Commercial Business Track and Workshops; User papers originally from the Business GIS Summit
