

Euromap Starts Receiving IRS-P6 Imagery

Euromap, a wholly owned subsidiary of GAF AG and the German Aerospace Centre (DLR), have started receiving data from the IRS-P6 Resourcesat-1, the new Indian Remote Sensing Satellite. Indian satellite imagery is marketed through Antrix, the commercial arm of the Indian Space Research Organisation (ISRO), and through the US company Space Imaging, which has obtained international commercial rights. Euromap has entered an agreement with Antrix and Space Imaging to receive and distribute Resourcesat-1 data collected over Europe and North Africa. Euromap represents the only IRS-P6 receiving and distribution facility in Europe.
