

European Repair Centre for CHC

CHC Navigation, headquartered in China, has extended its customer service by opening a European Repair Centre. Located in Poland and managed by CHC's partner GPS.PL, the Repair Center is fully equipped to meet the needs of EU partners and customers who require fast, flexible and reliable repair services.

The European Repair Centre provides customers with the highest level of confidence by using only OEM parts and applying the company's same stringent quality standards, according to George Zhao, CEO of CHC. The entire staff of GPS.PL has completed factory training and are highly motivated to provide quality, with their many years of experience in the GNSS industry enabling them to professionally support CHC's users in the region, confirmed Eryk Lipinski, managing director of GPS.PL.
