

Explore the latest in geospatial technology at GEO Business 2023

The countdown is on for GEO Business 2023, a top trade event that brings together experts and professionals in the geospatial field. Co-located with the Digital Construction Week, the event from 17-18 May at ExCeL London features 120 global brands and start-ups, and over 120 sessions in the CPD-accredited education programme. Attendees can learn about the latest developments, including in AI,

BIM, cloud computing, Lidar, robotics, SLAM and UAVs.

At GEO Business 2023, attendees will receive a major update on the very latest in the geospatial industry, ranging from expert speakers in the CPD-accredited education programme. They will get up to speed on the newest developments in artificial intelligence, BIM, cloud computing, GIS, GNSS, Lidar, reality capture, remote sensing, robotics, SLAM, UAVs and more. With actionable insights, inspiring case studies and practical advice, the education programme will provide attendees with an excellent opportunity to learn from the brightest minds in the profession.

Innovating with geospatial data

According to the organizers, more than 120 global brands and start-ups will exhibit at the event, showcasing the latest tech, tools and solutions for geospatial. Attendees can earn Continuing Professional Development (CPD) hours by attending the accredited education programme, which features expert speakers sharing their insights on the industry's newest developments.

"[GEO Business](#) connects the data holders and processors with those who benefit from the applications and insight that geospatial information provides," stated the event organizers. "Whether you are involved in collecting or using geospatial data, rely on up-to-date geospatial information, or research or develop geospatial technologies, GEO Business has something for you."

The co-located Digital Construction Week offers attendees the opportunity to discover thousands of products from over 150 major brands and start-ups, and meet the teams behind innovations in AI, automation, BIM, information management, IoT, modular building, robotics, VR and more. The event promises to be an excellent complement to GEO Business, providing a comprehensive showcase of cutting-edge technologies that are driving the digital transformation of the construction industry.

GEO Business 2023 and Digital Construction Week offer attendees an opportunity to get up close with innovative products, network with industry peers, explore career opportunities and keep up to date with the latest industry trends.
