

# Geo-matching.com Adds CAD Software Category

Geo-matching.com has recently added CAD Software to its broad spectrum of product categories. Pythagoras and Orthograph Architect are the first suppliers in this category. In addition to general specifications, detailed information is given about storage, interoperability and data analysis.

[Geo-matching.com](http://www.geo-matching.com) is the independent geomatic and hydrographic product comparison website featuring detailed spec-based comparisons and user reviews for more than 800 products in 32 product categories. The website guides users through the maze of specifications and gives them the opportunity to compare products from different suppliers and read other professionals' reviews in order to reach a balanced judgment before buying.

The website brings together the highly valued *Hydro International* and *GIM International* product surveys all in one place. Just some of the categories on offer include Digital Aerial Cameras, GNSS Receivers, Mobile GIS Systems – Hardware and Software, Mobile Mappers, Photogrammetric, Imagery Processing Software, [Point Cloud Processing Software](#), [Remote Sensing Image Processing Software](#), [Terrestrial Laser Scanners](#), [Total Stations](#), and [UAS for Mapping and 3D Modelling](#).

Visit [www.geo-matching.com](http://www.geo-matching.com) to browse through the products, upload a product or leave a review. Feel free to contact [sybout.wijma@geomares.nl](mailto:sybout.wijma@geomares.nl) for more information.
