

Geo-matching.com Adds Ground Penetrating Radar Category

Geo-matching.com has recently added Ground Penetrating Radar to its broad spectrum of product categories. US Radar is the first supplier in this category with its 100 Series Geotechnical Systems product. In addition to general specifications, detailed information is given about data loggers, antennae and control modules.

Geo-matching.com (www.geo-matching.com) is the independent geomatic and hydrographic product comparison website featuring detailed spec-based comparisons and user reviews for more than 750 products. The website guides users through the maze of specifications and gives them the opportunity to compare products from different suppliers and read other professionals' reviews in order to reach a balanced judgment before buying.

The website brings together the highly valued *Hydro International* and *GIM International* product surveys all in one place. Just some of the categories on offer include Digital Aerial Cameras, GNSS Receivers, Mobile GIS Systems – Hardware and Software, Mobile Mappers, Photogrammetric, Imagery Processing Software, [Point Cloud Processing Software](#), [Remote Sensing Image Processing Software](#), [Terrestrial Laser Scanners](#), [Total Stations](#), and [UAS for Mapping and 3D Modelling](#).

Visit www.geo-matching.com to browse through the products, upload a product or leave a review. To see the Ground Penetrating Radar category, visit www.geo-matching.com/category/id76-ground-penetrating-radar.html. Feel free to contact sybout.wijma@geomares.nl for more information.
