

GeoDATA 2014 Tour Calls at Glasgow, Belfast and London

GeoDATA 2014

This year in the United Kingdom, several GeoDATA 2014 events have already been held in a free series of intuitive, one-day seminars on the latest developments in the geospatial industry. The remaining 2014 events are taking place in Glasgow, Belfast and London during November and December.

At each event, the organising committee has created a seminar programme and supporting exhibition that is of immediate and practical relevance to every professional working with spatial data, products and services. First-rate presentations, real life case studies and examples of best practice offer participants an excellent opportunity to explore geospatial technology and applications in this fast moving industry.

To find out more please visit the event website www.geoaware.info and take some time to view the content available including exhibitors, seminar topics and agendas.

Registration is open [online](#).
