

# Geodirect to Represent Stonex Europe

STONEX Europe signed a reseller agreement with Geodirect for selling and supporting STONEX professional GNSS and optical positioning systems in Belgium, the Netherlands and Luxembourg. STONEX is the manufacturer of professional positioning products, establishing a significantly market share in Europe.

Geodirect is an innovative technical trading company with a strong focus on sales and support of professional positioning products. To provide the user a 'total solution' Geodirect can offer, besides STONEX products, PENMAP (developer of intuitive field software), CARLSON software (Developer of surveying and civil desktop solutions), CST/Berger (Manufacturer of line- and rotation lasers, automatic levels and accessories/measuring tools), HANDHELD (distributor of rugged portable computers and PDA's) and 06-GPS (the first TÜV SÜD certified RTK network in the Netherlands).

Besides the distribution of Survey+ GIS equipment and easy to use software Geodirect also provides customers with a helpdesk, on-site support and training courses. With experienced employees in Surveying, GIS and civil engineering Geodirect can provide end-users with custom courses based on their own workflow.

Geodirect offers users in the Benelux to try the Stonex S9 GNSS in combination with SurvCE or Penmap field software for one week, free of charges. The system will be delivered with a complete instruction.
