

# GeoMax Steps into Europe

GeoMax, a Hexagon company, steps into Europe, presenting a range of affordable instruments for surveying, engineering and construction. GeoMax is an internationally active company developing, manufacturing and distributing surveying instruments. Both occasional and professional users are addressed with GeoMax's portfolio of integrated instruments: Total Stations, GPS, Lasers, Rotators, optical and digital Levels, related software and accessories for the surveying, engineering, construction, cadastre and GIS market.

Being part of the Swedish Hexagon Group, a global technology group with strong market positions within measurement technologies, grants GeoMax' access to development and production facilities in Europe, America and Asia.

GeoMax builds on an international network of qualified distribution partners. The first country to be approached was Turkey. With the Turkish dealer Geopos, GeoMax can rely on a partner with more than 25 years of experience. The second step for GeoMax will be Italy during summer 2008.
