

# GEOSAM to Promote SuperGIS Applications in Peru

Supergeo Technologies has announced a new partnership with GEOSAM S.A.C. in Peru, to collaborate on the promotion of SuperGIS products in Central and South America. The co-operation will focus on an ambitious programme of local brand enhancement that seeks to facilitate good communication with the target clients offering brochures of SuperGIS software in Spanish and professional product training to create more business opportunities.

Based in Lima, Peru, GEOSAM is the professional GIS consulting company which offers a variety of GIS services including LBS, development software, training, etc. The company is also proficient in developing custom GIS systems to help organizations reach crucial policy decisions with reliable spatial analysis and references.

After being evaluated completely by GEOSAM, SuperGIS software is regarded as the best alternatives for GIS solutions due to its powerful GIS functions and affordable prices. Users now can enormously benefit from easily overcoming the operational problems and challenges using SuperGIS software and applications.
