

# Geoscience Australia is Main Sponsor of IGARSS2013

Geoscience Australia has taken the lead role in the sponsorship of the IGARSS2013 Symposium. Geoscience Australia is a leading provider of geoscientific information and knowledge enabling the Australian government to make informed decisions about the use and management of resources, the environment, community wellbeing and sustainable energy.

The IEEE International Geoscience and Remote Sensing Symposium (IGARSS) is a global event which promises to bring together experts engineers, researchers, teachers, scientists and students from around the world to review the latest issues and studies utilising remote sensing technologies for observations of the Earth, oceans, atmosphere and space.

This event presents excellent promotional and networking opportunities for companies, government agencies, educational institutions, research facilities, scientific societies and others, exhibiting the latest in geoscience instruments, equipment, software, books and journals, and scientific programmes at the world's premier annual remote sensing symposium.

Attractive sponsorship opportunities are still available for interested parties. For more details on how you or your organisation can get involved, see [here](#).
