

# GeoSLAM Enters Partnership with Drone Specialists Heliguy

GeoSLAM has partnered with UK-based drone specialist Heliguy to provide professionals with sophisticated aerial mapping solutions. Drones have become a crucial tool for collecting accurate survey data quickly and safely, also in the construction industry.

The partnership between GeoSLAM's UAV ready [ZEB Horizon](#) and Heliguy's industry-leading hardware supply and support will empower drone mapping missions, benefiting industries such as surveying, architecture, engineering and construction (AEC), facilities management, mining, real estate, and security and defence.

Mike Workman, GeoSLAM's UK and Ireland channel manager, said: "This is an exciting opportunity for both [GeoSLAM](#) and Heliguy. The combined expertise from this partnership

will be extremely beneficial for customers looking to invest in Airborne LiDAR Solutions. Innovation and customer focus are core values shared by both our companies; I look forward to working with our new partner."

Matthew Cairns, part of [HELIGUY.com](#)'s DJI Enterprise team, said: "We are excited to work with GeoSLAM to deliver end-to-end and UAS-optimised LIDAR solutions to help our customers achieve their goals. For Heliguy, it is important to partner with a manufacturer whose operating principles are in line with our own. Clients should expect cutting-edge technology and robust support mechanisms from our partnership."
